Test log

header.php

Test case Comments Result **PASS**

Link given stylesheets correctly Link given scripts correctly **PASS** Replace login link with user account and logout link if PASS

user is logged in

Show add book link if logged in user is an admin **PASS**

Show basket link if user is logged in **PASS**

footer.php

Result **Comments Test case**

PASS Correct year outputted

components.php

Test case Result **Comments**

Page header displays correctly **PASS PASS** Page footer displays correctly

connection.php

Test case Result **Comments**

Successfully connect to database and return the **PASS**

connection object

Output error message on database connection error **PASS**

book-list.php

Test case Result **Comments**

Books pulled from database **PASS** Book gallery displays correctly **PASS** Book links get correct id **PASS**

Display "no books found" message if books table is

empty

book.php

PASS

PASS

Test case Result **Comments**

Book pulled from database **PASS PASS** Book data displays correctly

Missing id URL parameter redirects user to booklist.php

Non-numeric id given in URL parameter redirects **PASS** user to book-list.php

Non-existent book id displays a "book not found" **PASS** message

Add to basket button adds or increases quantity of **PASS** book in basket

Redirect user to login.php if they attempt to add a

book to their basket when they are not logged in

login.php Result

PASS

PASS

User is redirected to book-list.php if they are already

logged in

Test case

PASS Login form submission detected correctly

Registration form submission detected correctly **PASS** Successful login redirects user to book-list.php **PASS** Successful registration redirects user to registration-**PASS**

success.php
